This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Legal & General Global Inflation Linked Bond Index Fund I Class Accumulation ISIN: GB00BBHXNN27

This fund is managed by Legal & General (Unit Trust Managers) Limited.

## OBJECTIVE AND INVESTMENT POLICY

### Objective

The objective of this fund is to provide a mixture of income and growth (if the income is reinvested) by tracking the performance of the Bloomberg Barclays World Government Ex UK Inflation Linked Bonds TR Hedged GBP Index.

### Investment policy:

- The fund will invest between 80% and 100% in bonds (a type of loan which pays interest) included in the Index. These bonds will have a pre-set rate of income (either set at a fixed level or varying in a predetermined way).
- The fund's investments will closely match those that make up the Index and this will be achieved through investing in a sample selection of the bonds in the Index. The bonds are issued in the relevant national currency by governments around the world (excluding the UK). The interest and capital returns on these bonds will be linked to local inflation rates.
- The bonds that the fund invests in will be a mixture of investment grade bonds (rated as lower risk) and sub-investment grade bonds (rated as higher risk). The mix will closely match that of the Index. Investment and sub-investment grade bonds are bonds that have been given a credit rating by a rating agency. Credit ratings give an indication of how likely it is that the issuer of a bond will be able to pay back interest and the loan on time.
- 35% or more of the fund can be invested in United States government or public bonds.

- The fund may use derivatives (contracts which have a value linked to the price of another asset) to:
  - reduce risk or cost; or
  - generate additional capital or income with no, or an acceptably low, level of risk.
- It will also use currency derivatives for investment purposes to manage the effect of fluctuations in exchange rates with Sterling, in order to maintain accurate tracking.
- The fund may also invest in other bonds, deposits, money market instruments and cash. Money market instruments are a type of security where cash can be deposited for short periods of time.

### Other information:

- If you hold accumulation units, income from investments held by the fund (interest) will be reinvested into the value of your units.
- You can buy or sell units in this fund on any working day. You need to contact us with your instruction before 3.00pm. This is the time we calculate unit prices for this fund. If you contact us after 3.00pm, the units will be bought or sold at the next working day's price.
- This fund is designed for investors seeking income from an investment which can form part of their existing savings portfolio.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

## RISK AND REWARD PROFILE

Lower risk ← Higher risk  
Potentially lower rewards Potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This risk and reward indicator is based on historical data which may not be a reliable indication of the fund's risk and reward category in the future.
- The category is based on the rate at which the value of the fund and the index it is tracking have moved up and down in the past.
- This fund is in category 3 because it invests in bonds issued by governments. These generally provide higher rewards and higher risks than investments in cash and lower rewards and lower risks than investments in company shares.
- The fund's category is not guaranteed to remain the same and may change over time.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.
- The risk and reward indicator may not take account of the following risks of investing in the fund:
  - This fund holds bonds that, rather than being traded on an exchange, are traded through agents, brokers or investment banks matching buyers and sellers. This makes the bonds less easy to buy and sell than investments that are traded on an exchange and on any particular day there may not be a buyer or a seller for the bonds. In times of market uncertainty or if an exceptional amount of withdrawals are requested it may become less easy for your fund to sell investments. If this happens, the value of your fund may fall and in extreme circumstances this may also force a delay in buying and selling your investment in the fund, which may mean you have to wait for your money to be invested or returned. The fund can only delay paying out if it is in the interests of all investors and with the permission of the fund trustee or depositary.
- Investment returns on bonds are particularly sensitive to trends in interest rate movements. Their values are likely to fall when interest rates rise. Such falls may be more pronounced in a low interest rate environment. Bonds with a longer time to go before their maturity date will fall by more than bonds with a short time to their maturity date.
- This fund invests in inflation-linked bonds, which are particularly sensitive to changes in inflation rates. Their values are likely to fall when inflation rates fall.
- Credit ratings assigned to the individual assets in the fund can weaken and cause the value of those assets to fall.
- The fund invests in bonds which are issued by governments. If these governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of your fund may fall.
- The fund could lose money if any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains. The impact to the fund can be greater where derivatives are used in an extensive or complex way.
- There may be differences in performance between the fund's assets and the derivatives used to manage the fluctuation of exchange rates with Sterling. This could result at times in the fund being over protected or under protected against these fluctuations.
- The fund may have underlying investments that are valued in currencies that are different from Sterling (British Pounds). Any such investments will be impacted by exchange rate fluctuations and this may affect the value of your investment and any income from it. Currency hedging techniques may have been applied to reduce the impact of exchange rate fluctuations but may not entirely eliminate it.
- If you use your right to cancel your investment, you may not get a full refund if the value of your investment falls before we carry out your instruction.

## CHARGES FOR THIS FUND

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%*
Exit charge	0.00%*
This is the maximum that might be taken out of your money before it is invested.	
*The fund also incurs a unit price spread. See opposite.	
Charges taken from the fund over a year	
Ongoing charges	0.27%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- The entry and exit charges shown are maximum figures. In some cases (including when switching to other funds managed by us) you might pay less - you can find out the actual figures from us or your financial adviser.
- The ongoing charges figure is based on the latest available expenses at December 2016. This figure may change in the future.
- This fund's ongoing charges include any charges made by any other funds it may invest in.

### Other costs:

- **Unit price spread:** each day there are two prices for this fund: a higher price you pay to buy units and a lower price you receive when you sell units. The fund manager sets these prices. The difference between these prices is called the 'spread'.

The spread is separate to the entry, exit and ongoing charges shown in this section.

This fund's spread reflects the difference between the buying and selling prices of the assets it holds and costs associated with buying and selling the assets. The spread can change at any time and by any amount. As an example, the buying price for units in this fund was 0.17% higher than the selling price at 31 December 2016.

- For more information about charges and costs, please see the charges and expenses section in the fund's Prospectus, or visit our website at [legalandgeneral.com/chargesandfees](http://legalandgeneral.com/chargesandfees).

## PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the fund take into account all charges except any entry charge, and assume income (after any tax) is reinvested. The performance has been calculated in Sterling (British pounds).
- The fund will not replicate the performance of its benchmark index perfectly. This is because the fund will incur drags on performance such as expenses, tax and transactions costs, which the benchmark index is not subject to.
- The annual return is for a 12 month period ending 31 December.
- The fund launched in 2013.
- This unit class launched in 2013.

# Schroder European Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

## Class L Accumulation GBP (GB00BDD2CB80)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

### Objectives and Investment Policy

#### Objectives

The fund aims to provide capital growth by investing in equities of European companies, excluding the UK.

#### Investment Policy

The fund invests at least 80% of its assets in equities of large and mid sized European companies, excluding the UK. These are companies that, at the time of purchase, are considered to be in the top 90% by market capitalisation of the European equities market.

The fund may also invest in collective investment schemes and warrants, and hold cash.

The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.

#### Benchmark

This unit class is managed with reference to the FTSE World Series Europe ex UK TR GBP financial index. The manager invests on a discretionary basis and is not limited to investing in accordance with the composition of this benchmark.

#### Dealing Frequency

You may redeem your investment upon demand. This fund deals daily.

#### Distribution Policy

This unit class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the unit class.

### Risk and Reward Profile

#### The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time.

A fund in the lowest category does not mean a risk-free investment.

The fund is in this category because it can take higher risks in search of higher rewards and its price may rise and fall accordingly.

#### Risk factors

The following risks may affect fund performance.

**Currency risk:** The fund can be exposed to different currencies. Changes in foreign exchange rates could create losses.

**Equity risk:** Equity prices fluctuate daily, based on many factors including general, economic, industry or company news.

**Liquidity risk:** In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares.

**Operational risk:** Failures at service providers could lead to disruptions of fund operations or losses.

# Schroder Tokyo Fund

an Authorised Unit Trust of Schroder Unit Trusts Limited

## Class L Accumulation GBP (GB00BDD2J739)

This fund is managed by Schroder Unit Trusts Limited, which is a member of the Schroders Group.

### Objectives and Investment Policy

#### Objectives

The fund aims to provide capital growth.

#### Investment Policy

At least 80% of the fund will be invested in shares of Japanese companies. The fund has no bias to any particular industry or size of company.

Investment is based on Japan's economic strengths, such as its manufacturing industry (in particular those parts that are demonstrating an ability to exploit newly emerging technology) and on sectors benefiting from structural change in the economy. The fund uses Tokyo-based in-house research to identify and invest in attractively valued companies - those whose share prices appear low relative to long-term profit potential.

These opportunities are likely to be found across a broad range of industries and are identified by an intensive programme of in-house company contact and analysis.

The fund may also invest in other financial instruments and hold cash on deposit. Derivatives may be used to reduce risk or manage the fund more effectively.

#### Benchmark

This unit class is managed with reference to the Tokyo Stock Exchange 1st Section Index (TOPIX) (TR) GBP financial index. The manager invests on a discretionary basis and is not limited to investing in accordance with the composition of this benchmark.

**iShares Corporate Bond Index Fund (UK)**

A sub-fund of BlackRock Collective Investment Funds

**Class H Accumulating GBP**

ISIN: GB00BJL5BV43

Manager: BlackRock Fund Managers Limited

**Objectives and Investment Policy**

- ▶ The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund’s assets, by tracking closely the performance of the Markit iBoxx GBP Non-Gilts Overall TR Index, the Fund’s benchmark index.
- ▶ The Fund invests in fixed income securities (such as bonds) that make up the benchmark index and, at the time of purchase, comply with the credit rating requirements of the benchmark index.
- ▶ The benchmark index measures the performance of fixed income securities denominated in Sterling issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) but excludes gilts (i.e. bonds) issued by the UK government. These may include fixed income securities which pay income according to a fixed rate of interest and will be investment grade (i.e. meet a specified level of credit worthiness) at the time of inclusion in the benchmark index.
- ▶ The Fund uses techniques to achieve a similar return to its benchmark index. These techniques may include the strategic selection of certain securities that make up the benchmark index or other fixed income securities which provide similar performance to certain constituent securities. They may also include the use of derivatives (i.e. investments the prices of which are based on one or more underlying assets).
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund’s base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £50,000,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund’s prospectus, available on the product pages at [www.blackrock.com](http://www.blackrock.com)

**Risk and Reward Profile**

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated three due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund’s investments or expose the Fund to losses.

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due. If a financial institution is unable to meet its financial obligations, its financial assets may be subject to a write down in value or converted (i.e. “bail-in”) by relevant authorities to rescue the institution.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

\*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 25 April 2017. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None*
This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.	
Charges taken from the Fund over each year	
Ongoing Charges	0.11%**
Charges taken from the Fund under certain conditions	
Performance Fee	None

## Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2010. The unit class was launched in 2014.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

† Benchmark: iBoxx Sterling Non Gilt 1300CET (midday) index (GBP)

Historic performance to 31 December 2016

As of 29 April 2016, the benchmark index converted from a close of business valuation to a midday valuation. Historic performance of the benchmark index has been simulated by the benchmark index provider and such data is used for the purposes of demonstrating historic performance in the "Past Performance" table from 30 June 2010 or from the launch of the share class if later.

## Practical Information

- ▶ The trustee of the Fund is BNY Mellon Trust & Depository (UK) Limited. The trustee has delegated the function of custodian of the Fund to the Bank of New York Mellon (International) Limited.
- ▶ Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the BlackRock Collective Investment Funds (BCIF). These documents are available free of charge in English. These can be found, along with other information, such as unit prices, on the BlackRock website at [www.blackrock.com](http://www.blackrock.com), on the iShares website at [www.ishares.com](http://www.ishares.com) or by calling Investor Services on 0800 44 55 22.
- ▶ Investors should note that the tax legislation that applies to the Fund may have an impact on the personal tax position of your investment in the Fund.
- ▶ The Fund is a sub-fund of BCIF, an umbrella structure comprising different sub-funds. This document is specific to the Fund and unit class stated at the beginning of this document. However, the prospectus, annual and half-yearly reports are prepared for the umbrella.
- ▶ BlackRock Fund Managers Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Fund's prospectus.
- ▶ The assets of the Fund are held on trust for its unitholders under English trust law which means that its assets cannot be used to discharge the liabilities of other sub-funds within BCIF. In addition, the Fund's assets are held separately from the assets of other sub-funds.
- ▶ Investors may switch their units in the Fund for units in another sub-fund within BCIF, subject to meeting certain conditions as set out in the prospectus.
- ▶ The Remuneration Policy of the Management Company, which describes how remuneration and benefits are determined and awarded, and the associated governance arrangements, is available at [www.blackrock.com/Remunerationpolicy](http://www.blackrock.com/Remunerationpolicy) or on request from the registered office of the Management Company.

## Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

### Invesco Perpetual Corporate Bond Fund (the "Fund") A sub-fund of Invesco Perpetual Fixed Interest Investment Series ICVC (the "Company") Y Accumulation share class (ISIN: GB00BJ04F760) (the "Share Class")

The Fund is managed by Invesco Fund Managers Limited, part of the Invesco Group.

#### Objectives and Investment Policy

- The objective of the Fund is to achieve a combination of income and capital growth over the medium to long term.
- The Fund invests primarily in corporate fixed interest and other debt securities.
- The Fund may use derivatives (complex instruments) and other financially linked instruments in order to meet the Fund's investment objective and to reduce risk, minimise costs and/or generate additional capital or income.
- The Fund is actively managed within its objectives and is not constrained by a benchmark.
- You can buy, sell and switch shares in the Fund on any UK business day.
- Any income from your investment will be reinvested.
- Recommendation: The Fund may not be appropriate if you plan to withdraw your money within 5 years.

#### Risk and Reward Profile

- The Share Class is in risk category 3 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

#### Other Risks

- The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and you may not get back the full amount invested. Over time, inflation may erode the value of investments.
- The securities that the Fund invests in may not always make interest and other payments nor is the solvency of the issuers guaranteed. Market conditions, such as a decrease in market liquidity for the securities in which the Fund invests, may mean that the Fund may not be able to sell those securities at their true value. These risks increase where the Fund invests in high yield or lower credit quality bonds and where we use derivatives.
- The Fund has the ability to make use of financial derivatives (complex instruments) which may result in the Fund being leveraged and can result in large fluctuations in the value of the Fund. Leverage on certain types of transactions including derivatives may impair the Fund's liquidity, cause it to liquidate positions at unfavourable times or otherwise cause the Fund not to achieve its intended objective. Leverage occurs when the economic exposure created by the use of derivatives is greater than the amount invested resulting in the Fund being exposed to a greater loss than the initial investment.
- The Fund may be exposed to counterparty risk should an entity with which the Fund does business become insolvent resulting in financial loss.
- The Fund's performance may be adversely affected by variations in interest rates and the relative strength of world currencies or if Sterling strengthens against those currencies.
- A more detailed description of risk factors that apply to this Fund is set out in Section 30 of the Prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
<b>Entry charge</b>	5.00%

The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

### CF Woodford Equity Income Fund, Z Sterling Accumulation, a fund within CF Woodford Investment Fund (ISIN: GB00BLRZQC88)

The fund is managed by Capita Financial Managers Limited, part of the Asset Services Division of Capita plc.

### Objectives and investment policy

#### Objective

The fund aims to provide a reasonable level of income together with capital growth.

#### Investment Policy

The fund will invest primarily in the shares of companies listed in the United Kingdom. It may also invest in unlisted companies, overseas entities and derivatives. It is not anticipated that the use of derivatives will have a significant adverse effect on the risk profile of the fund.

Essential features of the fund:

- The fund has the discretion to invest in a range of investments as described above with no need to adhere to a particular benchmark.
- You can buy and sell shares in the fund every business day.
- Income from the fund will be added to the value of your investment.
- Derivatives may be used to manage the risk profile of the fund, reduce costs or generate additional income.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money in the shorter term (e.g. less than 3-5 years).

### Risk and reward profile

- This indicator shows how much a fund may have risen and fallen in the past, and therefore how much a fund's returns may have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains. The lowest number on the scale does not mean that a fund is risk free.
- The fund has been classed as 5 because its volatility has been measured as above average.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time.
- Counterparty Risk: As the fund may enter into derivative agreements there is a risk that other parties may fail to meet their obligations. This may lead to delays in receiving amounts due to the fund, receiving less than is due or receiving nothing.
- Currency Risk: As the fund invests in overseas securities movements in exchange rates may, when not hedged, cause the value of your investment to increase or decrease.
- Illiquid Asset Risk: Investment in illiquid assets, where there is no active market, may be more difficult to buy and sell and their prices may also be subject to large short term swings.
- For full details of the fund's risks, please see the prospectus which may be obtained from the address in 'Practical Information' overleaf.

### Charges for this Fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

#### One-off charges taken before or after you invest

<b>Entry Charge</b>	None
<b>Exit Charge</b>	None

#### Charges taken from the fund over the year

<b>Ongoing Charges</b>	0.65%
------------------------	-------

#### Charges taken from the fund under certain specific conditions

<b>Performance Fee</b>	None
------------------------	------

The ongoing charges figure is fixed at 0.65%. This figure may vary from year to year. The ongoing charges are taken from the capital of the fund. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

A dilution adjustment may be made which may increase or decrease the price you receive when you buy or sell shares in the fund.

For more information about charges, please see the prospectus Sections 25 & 26, which may be obtained free of charge from the address in 'Practical Information' below.

### Past performance

- Past performance is not a guide to future performance.
- The past performance in the chart shown opposite is net of tax and charges but excludes the entry charge that may be paid on the purchase of an investment.
- Launch date for the fund: 2 June 2014.
- Performance is calculated in Pounds Sterling.

## Fidelity Index US Fund

### a sub-fund of Fidelity Investment Funds

W Accumulation Shares (ISIN: GB00BLT1YN15)

This fund is managed by FIL Investment Services (UK) Limited

### Objectives and Investment Policy

- Aims to achieve long term capital growth by closely matching the performance of the S&P 500 index.
- Aims to hold company shares that represent the benchmark index.
- May use stock index futures to achieve the investment objective.
- Can use derivatives with the aim of risk or cost reduction or to generate additional capital or income in line with the fund's risk profile.
- Income is accumulated in the share price.
- Shares can usually be bought and sold each business day of the fund.
- This fund may not be appropriate for investors who plan to withdraw their money within 5 years. Investment in the fund should be regarded as a long-term investment.

Note: The S&P 500 index is a product of S&P Dow Jones Indices LLC and has been licensed to FIL Investment Management Limited ("FIL"). The Fidelity Index US Fund is not sponsored, endorsed, sold, or promoted by S&P Dow Jones Indices LLC or its affiliates and neither S&P Dow Jones Indices LLC, its affiliates, or their respective third party licensors make any representation regarding the advisability of investing in such product. S&P 500® is a registered trademark of Standard & Poor's Financial Services LLC and has been licensed to FIL.

### Risk and Reward Profile

- The risk category was calculated using historical performance data.
- The risk category may not be a reliable indication of the future risk profile of the fund, is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging may be used to minimise the effect of this but may not always be successful.
- The use of financial derivative instruments may result in increased gains or losses within the fund.

## Royal London Cash Plus Fund (Accumulation - Class Y Shares)

A sub-fund of Royal London Bond Funds ICVC ISIN: GB00BMNR1H58  
Managed by Royal London Unit Trust Managers Limited

### Objectives and investment policy

**Objective** To provide a combination of capital growth and income.

**Policy** The Fund invests in cash, deposits, money market instruments and government bonds with shorter maturities. The Fund may use derivatives, but for efficient portfolio management purposes only. Where relevant, investments will be screened to ensure they meet the Fund's predefined ethical criteria.

**Recommendation** Investors who seek income or a short-term investment option.

#### Concepts to understand

**Bonds** Securities that represent an obligation to repay a debt, with interest. High quality bonds are those that are viewed as being highly likely to make all scheduled payments of interest and principal. Low quality bonds carry higher risk but also typically pay higher rates of interest.

**Derivative** A financial instrument whose price is dependent upon or derived from one or more underlying asset.

**Efficient Portfolio Management** An investment technique that allows the use of derivatives for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

**Money market instruments** Investments that pay interest, have a short duration and are designed to maintain a stable value.

*You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.*

The following share classes are available for the Fund: Income M, Accumulation Y, Income Y (G), Income Y, Accumulation Z, Income Z, and Income X. All share classes are subject to a minimum investment. If this is an income share class, any net income will be paid out to you. If this is an accumulation share class, any net income will be reinvested in the Fund.

### Risk and reward profile

Lower potential risk/reward

Higher potential risk/reward

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The Fund is ranked in risk category 1 because its unit price has shown a very low level of volatility historically. As an investment, money market instruments are typically less volatile than bonds and shares. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

**Concentration Risk** Funds which invest in a smaller number of securities can carry more risk than funds spread across a larger number of companies. To the extent that the Fund has exposure to an issuer, geographical area or type of security that is heavily affected by an event, either positive or negative, its value may rise or fall.

**Counterparty Risk** Market counterparties could become unable to make interest payments or repay debt. As such the value of the Fund will fall in the event of a counterparty default. In general investments that pay a higher level of income usually reflect a lower counterparty credit rating because of the increased risk of default.

*For more about fund risks, see the risk factors section in the full Prospectus ([www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/](http://www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/))*

## Charges

The charges you pay as an investor in the Fund go to cover fund operating costs. These charges reduce the performance of your investment.

### One-off charges taken before or after you invest:

**Entry charge** 0.00%

**Exit charge** 0.00%

### Charges taken from the fund over a year:

**Ongoing charge** 0.15%

### Charges taken from the fund under specific conditions:

**Performance fee** none

There is no entry or exit charges attached to this share class. Ongoing charges figure is based on expenses for the year ending 30 April 2017. This figure may vary from year to year and does not include portfolio transaction costs. Ongoing charges are the same for all investors.

The charges you pay are used to pay the costs of running the Fund. These charges reduce the potential growth of the investment.

For more about charges, see the expenses section in the full Prospectus and supplement ([www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/](http://www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/))

**iShares UK Gilts All Stocks Index Fund (UK)**

A sub-fund of BlackRock Collective Investment Funds

**Class H Accumulating GBP**

ISIN: GB00BPFJDD09

Manager: BlackRock Fund Managers Limited

**Objectives and Investment Policy**

- ▶ The Fund aims to achieve a return on your investment, through a combination of capital growth and income on the Fund's assets, by tracking closely the performance of the FTSE Actuaries UK Conventional Gilts All Stocks Index, the Fund's benchmark index.
- ▶ The Fund invests in fixed income securities (such as bonds) that make up the benchmark index and, at the time of purchase, comply with the credit rating requirements of the benchmark index.
- ▶ The Fund's benchmark index measures the performance of Sterling denominated United Kingdom (UK) Government fixed income securities (gilts). The fixed income securities will have a credit rating which reflects that of the UK Government. The fixed income securities will pay income according to a fixed rate of interest.
- ▶ The Fund uses techniques to achieve a similar return to its benchmark index. These techniques may include the strategic selection of certain securities that make up the benchmark index or other fixed income securities which provide similar performance to certain constituent securities. They may also include the use of derivatives (i.e. investments the prices of which are based on one or more underlying assets).
- ▶ The Fund may also engage in short-term secured lending of its investments to certain eligible third parties. This is used as a means of generating additional income and to off-set the costs of the Fund.
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your units will be accumulating (i.e. dividend income will be included in their value).
- ▶ Your units will be denominated in Sterling, the Fund's base currency.
- ▶ You can buy and sell your units daily. The minimum initial investment for this unit class is £50,000,000.

For more information on the Fund, share/unit classes, risks and charges, please see the Fund's prospectus, available on the product pages at [www.blackrock.com](http://www.blackrock.com)

**Risk and Reward Profile**

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.

- Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.
- Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political or regulatory events.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

\*Subject to a charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 25 April 2017. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

\*\* To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

One-off charges taken before or after you invest	
Entry Charge	5.00%
Exit Charge	None*
This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.	
Charges taken from the Fund over each year	
Ongoing Charges	0.11%**
Charges taken from the Fund under certain conditions

## Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in GBP for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2005. The unit class was launched in 2014.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

Historic performance to 31 December 2016

† Benchmark: FTSE Actuaries UK Conventional Gilts All Stocks (Midday) Index (GBP)As of 29 April 2016, the benchmark index converted from a close of business valuation to a midday valuation. Historic performance of the benchmark index has been simulated by the benchmark index provider and such data is used for the purposes of demonstrating historic performance in the "Past Performance" table from 27 February 2015 or from the launch of the share class if later.

## Practical Information

- ▶ The trustee of the Fund is BNY Mellon Trust & Depository (UK) Limited. The trustee has delegated the function of custodian of the Fund to the Bank of New York Mellon (International) Limited.

## Legal & General UK Index Trust I Class Accumulation ISIN: GB00B0CNGN12

This fund is managed by Legal & General (Unit Trust Managers) Limited.

## OBJECTIVE AND INVESTMENT POLICY

### Objective

The objective of this fund is to provide growth by tracking the performance of the FTSE All-Share Index.

### Investment policy:

- The fund will invest almost entirely in company shares. The fund's investments will closely match those that make up the Index. The Index consists of a broad spread of UK company shares.
- The fund may use derivatives (contracts which have a value linked to the price of another asset) to:
  - reduce risk or cost; or
  - generate additional capital or income with no, or an acceptably low, level of risk.

### Other information:

- If you hold accumulation units, income from investments held by the fund (dividends) will be reinvested into the value of your units.
- You can buy or sell units in this fund on any working day. You need to contact us with your instruction before 12 noon. This is the time we calculate unit prices for this fund. If you contact us after 12 noon, the units will be bought or sold at the next working day's price.
- This fund is designed for investors looking to grow their money in an investment which can form part of their existing savings portfolio.
- Although investors can take their money out at any time, this fund may not be appropriate for those who plan to withdraw their money within five years.
- If you do not understand this document we recommend you seek additional information to help you decide if this fund is right for you.

## RISK AND REWARD PROFILE

Lower risk ← Higher risk  
Potentially lower rewards ← Potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- This risk and reward indicator is based on historical data which may not be a reliable indication of the fund's risk and reward category in the future.
- The category is based on the rate at which the value of the fund has moved up and down in the past.
- This fund is in category 5 because it invests in company shares which generally provide higher rewards and higher risks than other investments such as bonds, cash or commercial property.
- The fund's category is not guaranteed to remain the same and may change over time.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.

The risk and reward indicator may not take account of the following risks of investing in the fund:

- The fund could lose money if any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the fund.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The fund may have underlying investments that are valued in currencies that are different from Sterling (British Pounds). Any such investments will be impacted by exchange rate fluctuations and this may affect the value of your investment and any income from it. Currency hedging techniques may have been applied to reduce the impact of exchange rate fluctuations but may not entirely eliminate it.
- If you use your right to cancel your investment, you may not get a full refund if the value of your investment falls before we carry out your instruction.

## CHARGES FOR THIS FUND

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential return from your investment.

One-off charges taken before or after you invest	
Entry charge	0.00%*
Exit charge	0.00%*
This is the maximum that might be taken out of your money before it is invested.	
*The fund also incurs a unit price spread. See opposite.	
Charges taken from the fund over a year	
Ongoing charges	0.10%
Charges taken from the fund under certain specific conditions	
Performance fee	None

- The entry and exit charges shown are maximum figures. In some cases (including when switching to other funds managed by us) you might pay less - you can find out the actual figures from us or your financial adviser.
- The ongoing charges figure is based on the latest available expenses at December 2016. This figure may change in the future.
- This fund's ongoing charges include any charges made by any other funds it may invest in.

### Other costs:

- **Unit price spread:** on any day, the prices for buying or selling units in this fund are the same. However, there are maximum and minimum prices we can charge for units, reflecting the difference between the buying and selling prices of the assets in the fund and costs associated with buying and selling the assets. We can move the price depending on whether money is coming into or leaving the fund. The fund manager sets these prices. From day to day we will move the unit price between these prices as necessary. The difference between the maximum and minimum prices is called the 'spread'.
- The spread is separate to the entry, exit and ongoing charges shown in this section. The spread can change at any time and by any amount. As an example, the maximum price for units in this fund was 0.56% higher than the minimum price at 31 December 2016.
- For more information about charges and costs, please see the charges and expenses section in the fund's Prospectus, or visit our website at [legalandgeneral.com/chargesandfees](http://legalandgeneral.com/chargesandfees).

## PAST PERFORMANCE

- Past performance is not a guide to future performance.
- The figures for the fund take into account all charges except any entry charge, and assume income (after any tax) is reinvested. The performance has been calculated in Sterling (British pounds).
- The fund will not replicate the performance of its benchmark index perfectly. This is because the fund will incur drags on performance such as expenses, tax and transactions costs, which the benchmark index is not subject to.
- The annual return is for a 12 month period ending 31 December.
- The fund launched in 1992.
- This unit class launched in 2005.

## PRACTICAL INFORMATION

# Investec Asia ex Japan Fund

A sub-fund of Investec Funds Series ii  
Managed by Investec Fund Managers Limited

Class I Accumulation shares in sterling  
ISIN: GB00B1XFJD49

### Objectives and investment policy

The Fund aims to provide long-term capital growth.

The Fund invests primarily in the shares of companies in the Asian region (excluding Japan).

The Fund may invest in other assets such as cash, other funds and derivatives (financial contracts whose value is linked to the price of an underlying asset).

The Investment Manager is free to choose how the Fund is invested. However, the MSCI All Countries Asia ex Japan Index is currently taken into account when the Fund's investments are selected.

Any income due from your investment is reflected in the value of your shares rather than being paid out.

You can buy or sell shares in the Fund on any business day in the UK, as defined in the Investec Funds Series omnibus prospectus (section 3).

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short to medium term.

### Risk and reward profile

This indicator is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean 'risk free'.

The value of your investment and any income from it can fall as well as rise and you are not certain of making profits; losses may be made.

The Fund appears towards the middle of the Risk and Reward Indicator scale. This is because it invests in the shares of companies, whose values tend to fluctuate more widely.

#### Risks that may not be fully captured by the Risk and Reward Indicator:

**Currency exchange:** Changes in the relative values of different currencies may adversely affect the value of investments and any related income.

**Derivatives:** The use of derivatives is not intended to increase the overall level of risk. However, the use of derivatives may still lead to large changes in value and includes the potential for large financial loss.

**Developing market:** Some countries may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.

**Equity investment:** The value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

**Geographic / Sector:** Investments may be primarily concentrated in specific countries, geographical regions and/or industry sectors. This may mean that the resulting value may decrease whilst portfolios more broadly invested might grow.

**Third party operational:** The Fund's operations depend on third parties. Investors in the Fund may suffer disruption or financial loss in the event of third-party operational failure.

The full list of the Fund's risks are contained in Appendix VII of Investec Funds Series omnibus prospectus.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment. The entry charge shown is the most you might pay, in some cases you might pay less. You can find out actual entry charges from your financial adviser.

The ongoing charges figure is based on last year's expenses for the year ending 31 December 2016. The figure excludes any performance fee and portfolio transaction costs, except in the case of an entry or exit charge paid by the Fund when buying or selling units in another fund. Ongoing charges may vary from year to year.

For more information about charges, please see section 7 of the Investec Funds Series omnibus prospectus.

### One-off charges taken before or after you invest

Entry charge	0%
--------------	----

Exit charge	None
-------------	------

This is the maximum that might be taken out of your money before it is invested.

### Charges taken from the fund over a year

## Past performance

Past performance is not a guide to future performance. The value of your investment and income from it may go down as well as up and you may not get back the amount you invested.

The past performance shown in the chart takes account of all charges except the Fund's entry charge and the past performance is calculated in sterling.

The Fund was launched on 3 March 1997 and this share class on 1 June 2007.

(1): Performance has been simulated for this period based on a longer established share class

## Practical information

The Fund's depositary is State Street Trustees Limited. The latest published prices for shares in the Fund are available on [www.investecassetmanagement.com](http://www.investecassetmanagement.com). Other share classes are available for this Fund as described in the Investec Funds Series omnibus prospectus. UK tax legislation may have an impact on your personal tax position.

The Fund is a sub-fund of Investec Funds Series ii. You may switch between other Investec Funds Series i, ii, iii or iv sub-funds or share classes of the same sub-fund at no extra charge (unless the other share class has a higher entry charge, in which case the difference may be payable). Details on switching are contained in section 3 of the Investec Funds Series omnibus prospectus. The assets of the Fund are ring-fenced and cannot be used to pay the debts of other Investec sub-funds in the same Investec Fund Series.

Investec Fund Managers Limited may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the Investec Funds Series omnibus prospectus.

## Franklin UK Mid Cap Fund

**Class W (inc) • ISIN GB00B8K8HH50** • A sub-fund of Franklin Templeton Funds  
The management company is Franklin Templeton Fund Management Limited

### Objectives and Investment Policy

Franklin UK Mid Cap Fund (the "Fund") aims to increase the value of its investments by more than the return of the FTSE 250 ex-Investment Trusts Index (excluding investment companies) over the medium to long term (meaning 3-5 years).

The Fund invests mainly in:

- equity securities of companies that are included in the FTSE 250 Index (excluding investment companies)

The investment team uses detailed company research and extensive UK equity investment experience to build a concentrated portfolio of medium sized UK companies. They look to invest in a relatively small number of companies that over the medium to long term, offer strong and sustainable growth potential, are financially sound and attractively-priced.

You may request the sale of your shares on any UK business day.

For the income share class shown in this document, dividend income is distributed to investors.

For further information on the Objectives and Investment Policy of the Fund, please refer to the "Investment Objectives and Policies of the Funds" section of the current prospectus of Franklin Templeton Funds.

#### Terms to Understand

**Equity securities:** Securities that represent an ownership stake in a company.

**FTSE 250 Index (excluding investment companies):** This index comprises medium sized companies, excluding investment companies, listed on the London Stock Exchange. The Index is used to assess the change in value of the securities which comprise it.

### Risk and Reward Profile

#### What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

As the share class has no sufficient historical data available, simulated data

based on a representative portfolio model or benchmark have been used instead.

#### Why is the Fund in this specific category?

The Fund invests mainly in equity securities of mid-sized UK companies that are included in the FTSE 250 ex-Investment Trusts Index. Such securities have historically been subject to price movements, sometimes to a greater extent than securities of large UK companies, due to company-specific factors or movements in the UK equity markets generally. As a result, the performance of the Fund can fluctuate considerably over time.

#### Risks materially relevant not adequately captured by the indicator:

**Liquidity risk:** the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Reduced liquidity may have a negative impact on the price of the assets.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Factors" section of the current prospectus of Franklin Templeton Funds.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

\*This share class is only available through certain financial advisers which may apply their own charges. You may find more information about charges from your financial adviser.

The ongoing charges are based on the expenses for the year ending 31 December 2016. This figure may vary from year to year.

For detailed information about charges, please refer to the "Fees and Charges" section of the current prospectus of Franklin Templeton Funds.

## Past Performance

(This benchmark is provided for information and indicative purposes only.)

The Franklin UK Mid Cap Fund was launched on 17/10/11 to receive the assets of Rensburg UK Mid Cap Growth Trust. Past performance from the start of the performance chart has been simulated and is based on mid-price of the Trust and from 17/10/11 up to the launch date of the share class has been simulated by taking the performance of another existing share class of the Fund, which does not differ materially in the extent of its participation in the assets of the Fund.

- Past performance is not a guide to future performance.
- The past performance shown here includes all the ongoing charges.
- Past performance is calculated in GBP
- The Fund was launched in 2011 and the present share class on 21/09/2012.

## Royal London Short Term Money Market Fund (Accumulation - Class Y Shares)

A sub-fund of Royal London Bond Funds ICVC ISIN: GB00B8XYYQ86  
Managed by Royal London Unit Trust Managers Limited

### Objectives and investment policy

**Objective** To provide stability of capital and to provide an income in line with money market rates.

**Policy** The Fund invests in sterling denominated money market instruments. The Fund may use derivatives, but for efficient portfolio management purposes only. Where relevant, investments will be screened to ensure they meet the Fund's predefined ethical criteria.

**Recommendation** Investors who seek current income, protection of capital (but not guaranteed) or a short-term investment option.

#### Concepts to understand

**Derivative** A financial instrument whose price is dependent upon or derived from one or more underlying asset.

**Efficient Portfolio Management** An investment technique that allows the use of derivatives for at least one of the following purposes: to increase the value of the Fund; to protect the value of the Fund or to reduce the risks of certain investments.

**Money market instruments** Investments that pay interest, have a short duration and are designed to maintain a stable value.

*You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.*

The following share classes are available for the Fund: Income Y, Accumulation Y. All share classes are subject to a minimum investment. If this is an income share class, any net income will be paid out to you. If this is an accumulation share class, any net income will be reinvested in the Fund.

### Risk and reward profile

The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.

A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.

The Fund is ranked in risk category 1 because its unit price has shown a very low level of volatility historically. As an investment, money market instruments are typically less volatile than bonds and shares. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund.

The indicator is calculated using a standard methodology that is used by all companies offering such funds in Europe.

The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.

The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:

**Concentration Risk** Funds which invest in a smaller number of securities can carry more risk than funds spread across a larger number of companies. To the extent that the Fund has exposure to an issuer, geographical area or type of security that is heavily affected by an event, either positive or negative, its value may rise or fall.

**Counterparty Risk** Market counterparties could become unable to make interest payments or repay debt. As such the value of the Fund will fall in the event of a counterparty default. In general investments that pay a higher level of income usually reflect a lower counterparty credit rating because of the increased risk of default.

*For more about fund risks, see the risk factors section in the full Prospectus ([www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/](http://www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/))*

## Charges

The charges you pay as an investor in the Fund go to cover fund operating costs. These charges reduce the performance of your investment.

### One-off charges taken before or after you invest:

**Entry charge** 0.00%

**Exit charge** 0.00%

### Charges taken from the fund over a year:

**Ongoing charge** 0.09%

### Charges taken from the fund under specific conditions:

**Performance fee** none

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

For the entry and exit charges, if you are not eligible for this share class you will pay more than the amounts shown. Consult your financial adviser.

Ongoing charges figure is based on expenses for the year ending 30 April 2017. This figure may vary from year to year and does not include portfolio transaction costs. Ongoing charges are the same for all investors.

The charges you pay are used to pay the costs of running the Fund. These charges reduce the potential growth of the investment.

For more about charges, see the expenses section in the full Prospectus and supplement ([www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/](http://www.rlam.co.uk/Home/Individual-Investor/Fund-Performance--Prices/))

## Past performance

The graph shows fund performance over the past 5 years where available. Past performance is no guarantee of future performance. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.

The Fund was launched on 22 July 1999 and the share class on 26 November 2012.

The Fund was initially launched as a unit trust but was converted to an open-ended investment company (OEIC) with effect from 30 April 2010.

## MAJEDIE UK EQUITY FUND (GBP)

Class X Acc

ISIN GB00B88NK732

This fund is a sub-fund of the Majedie Asset Management Investment Fund Company, an open ended investment company managed by Majedie Asset Management Limited as the Authorised Corporate Director.

### OBJECTIVES AND INVESTMENT POLICY

The Fund aims to produce a total return in excess of the FTSE All-Share Index over the long term through investment in a diversified portfolio of predominantly UK equities. "Total return" means the combined return of capital and income and a consistently positive return is not guaranteed.

At least 80% of the Fund will be invested in UK equities, with the balance in international equities, cash or near cash. It is not the intention to invest materially in emerging markets.

There is no policy to restrict investment to particular economic sectors.

There will be no borrowing for investment purposes.

No more than 10% of the scheme property may be invested in other collective investment schemes. Up to 20% may be held in cash or near cash.

The Class X Acc shares in this Fund are accumulation shares. This means income from the Fund's investments will be included in the value of your shares rather than being paid out via a dividend.

This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

### RISK & REWARD PROFILE

The Risk and Reward indicator table demonstrates where the Fund ranks in terms of its potential risk and return. The higher the rank, the greater the potential reward but the greater the risk of losing money.

The risk category shown is not guaranteed and may shift over time. The lowest category does not mean risk free.

The shaded area in the table below shows the above named Fund's ranking on the Risk and Reward Indicator. The indicator uses a standard calculation method that is used by all EU companies who offer such funds to allow you to compare funds.

The indicator is based on historical data and may not be a reliable indication for the future.

1	2	3	4	5	6	7
---	---	---	---	---	---	---

Lower risk ← Higher risk  
Typically lower reward ← Typically higher reward

The Fund appears at the higher end of the Indicator scale reflecting the typically more volatile nature of a fund investing in securities of companies, as these price movements tend to be more volatile than bonds or other fixed income securities.

**Market Risk:** the investments of the Fund are subject to normal market fluctuations and the risk inherent in investment in equity securities and similar instruments and there can be no assurances that appreciation will occur.

**Equity Risk:** the value of equities may fall as well as rise and as a class of investment, equities are typically more volatile than other common investment types such as bonds or cash.

**Currency Risk:** the fund invests in international securities which are denominated in foreign currencies whose fluctuations may increase the fund's volatility and losses.

For more information on potential risks please request the Prospectus using the contact details overleaf.

## CHARGES

The charges you pay are used to pay the costs of running the Fund.

### ONE OFF CHARGES

Entry charge 0.00 %

Exit charge 0.00 %

### CHARGES TAKEN FROM THE FUND OVER A YEAR

Ongoing charges 0.77 %

### CHARGES TAKEN UNDER CERTAIN CONDITIONS

# Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

## Emerging Markets Fund

### a sub-fund of Fidelity Institutional Funds

W Accumulation Shares (ISIN: GB00B9SMK778)

This fund is managed by FIL Investment Services (UK) Limited

### Objectives and Investment Policy

- Aims to provide long-term capital growth with the level of income expected to be low.
- Invests primarily in company shares in countries experiencing rapid economic growth including those in Africa, the Indian sub-continent, Latin America, South East Asia, Europe and the Middle East.
- Has the freedom to invest outside the fund's principal geographies, market sectors, industries or asset classes.
- Can use derivatives with the aim of risk or cost reduction or to generate additional capital or income in line with the fund's risk profile.
- The fund has discretion in its choices of investments within its objectives and policies.
- Income is accumulated in the share price.
- Shares can usually be bought and sold each business day of the fund.
- This fund may not be appropriate for investors who plan to sell their shares in the fund within 5 years. Investment in the fund should be regarded as a long-term investment.

### Risk and Reward Profile

- The risk category was calculated using historical performance data.
- The risk category may not be a reliable indication of the future risk profile of the fund, is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging may be used to minimise the effect of this but may not always be successful.
- The use of financial derivative instruments may result in increased gains or losses within the fund.
- Liquidity is a measure of how easily an investment can be converted into cash. Under certain market conditions assets may be more difficult to sell.
- Emerging markets may be more volatile and it could be harder to sell or trade securities. There may be less supervision, regulation and less well-defined procedures than in more developed countries. Emerging markets can be sensitive to political instability, which can result in greater volatility and uncertainty, subjecting the fund to the risk of losses.
- In some emerging markets, such as Russia, the safekeeping provisions for securities benefit from less governed standards.

## Charges for this fund (ISIN: GB00B9SMK778)

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

### One-off charges taken before or after you invest

Entry charge N/A

Exit charge N/A

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

### Charges taken from the fund over a year

Ongoing charges 1.01%

### Charges taken from the fund under certain specific conditions

Performance fee N/A

The entry and exit charges shown are maximum figures. In some cases you might pay less - you can find this out from your financial adviser / distributor. The ongoing charges figure is based on expenses for the year ending 30/06/2016. This figure may vary from year to year. It excludes:

- performance fees (where applicable);
- portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information about charges, please consult the charges section in the most recent Prospectus.

## Past Performance

Past performance is not a guide to future performance results.

If any, the past performance shown takes into account the ongoing charges with exception of any applicable entry/exit charges.

The fund was launched on 28/07/1997. This class was launched on 13/05/2013. Past performance has been calculated in GBP.

If applicable, events in the fund's life which may have affected the performance history are highlighted as an <sup>\*\*\*</sup> in the chart, which may include changes to the fund's objective and details of such events can be found on our website or by requesting it from your appointed representative or your usual Fidelity contact. If applicable, the Investment Objective section shall refer to a benchmark and information on previous benchmarks may be found in the Annual Report and Accounts.

# Legg Mason Brandywine Global Fixed Income Fund

Class X GBP Accumulating

ISIN: IE00BSZLQJ44

**A sub-fund of:** Legg Mason Global Funds plc.

## Objectives and Investment Policy

### Objective

The fund's goal is to achieve income and growth of the fund's value.

### Investment Policy

- The fund invests in bonds issued by various governments.
- The fund only buys bonds that are highly rated at the time of purchase.
- The fund may invest in bonds issued in various currencies.
- The fund may invest up to 20% in bonds that are not represented in the Citigroup World Government Bond Index but are still highly rated at the time of purchase.
- The fund may invest in derivatives (financial instruments whose value is derived from the value of other assets), to help try to achieve the fund's objective as well as to reduce risk or cost or to generate additional growth or income for the fund.

**Manager's Discretion:** The fund manager has discretion in selecting investments within the fund's objective and investment policies.

**Fund's Base Currency:** US dollar

**Share Class Currency:** Pound Sterling

**Transaction Costs:** The fund bears costs in buying and selling investments, which may have a material impact on the fund's performance.

**Dealing Frequency:** You can buy, sell and switch your shares on each day that the New York Stock Exchange is open for business.

**Minimum Initial Investment:** For this share class the minimum initial investment is GBP 3,000,000.

**Treatment of Income:** Income and gains from the fund's investments are not paid but instead are reflected in the fund's share price.

## Risk and Reward Profile

The indicator is based on the volatility of the returns (past performance) of the reported share class (calculated on a 5 year rolling return basis). Where a share class is inactive / has less than 5 years of returns, the returns of a representative benchmark are used.

There is no guarantee that the fund will remain in the indicator category shown above and the categorisation of the fund may shift over time. Historical data, which is used in calculating the indicator, may not be a reliable indicator of the future risk profile of this fund.

The lowest category does not mean a risk-free investment.

The fund does not offer any capital guarantee or protection and you may not get back the amount invested.

The fund is in its risk/reward category because investments in a diversified portfolio of bonds from various countries and sectors, along with exposure to various currencies, have historically been subject to moderate fluctuations in value.

The fund is subject to the following risks which are materially relevant but may not be adequately captured by the indicator:

**Bonds:** There is a risk that issuers of bonds held by the fund may not be able to repay the investment or pay the interest due on it, leading to losses for the fund. Bond values are affected by the market's view of the above risk, and by changes in interest rates and inflation.

**Liquidity:** In certain circumstances it may be difficult to sell the fund's investments because there may not be enough demand for them in the markets, in which case the fund may not be able to minimise a loss on such investments.

**Concentrated fund:** The fund invests in fewer bonds than other funds which invest in bonds usually do. This means that the fund does not spread its risk as widely as other funds and will therefore be affected more if an individual investment performs poorly.

**Fund currency:** Changes in exchange rates between the currencies of investments held by the fund and the fund's base currency may negatively affect the value of an investment and any income received from it.

**Interest rates:** Changes in interest rates may negatively affect the value of the fund. Typically as interest rates rise, bond values fall.

**Derivatives:** The use of derivatives can result in greater fluctuations of the fund's value and may cause the fund to lose as much as or more than the amount invested.

**Fund counterparties:** The fund may suffer losses if the parties that it trades with cannot meet their financial obligations.

**Fund operations:** The fund is subject to the risk of loss resulting from inadequate or failed internal processes, people or systems or those of third parties such as those responsible for the custody of its assets.

**Class currency:** The value of your investment may fall due to changes in the exchange rate between the currency of your share class and the base currency of the fund.

For further explanation on the risks associated with an investment in the fund, please refer to the section entitled "Risk Factors" in the base prospectus and "Primary Risks" in the fund supplement.

## Charges

<b>One-off charges taken before or after you invest</b>	
<b>Entry charge</b>	none
<b>Exit charge</b>	none
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
<b>Charges taken from the fund over a year</b>	
<b>Ongoing charge</b>	0.86%
<b>Charges taken from the fund under certain specific conditions</b>	
<b>Performance fee</b>	none

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

Entry and exit charges shown are the maximum that might be taken out of your money. In some cases, you might pay less and you should speak to your financial adviser about this.

The ongoing charge is based on expenses for the 12 month period ending March 2017. This figure may vary over time.

For more information about charges, please see the "Fees and Expenses" sections of the base prospectus and fund supplement.

## Past Performance

The fund was launched on 1 October 2003 and the share class began issuing shares on 23 December 2014.

Past performance has been calculated in GBP.

The performance reflects all fees and charges payable by the fund but does not reflect any entry or exit charge that might be payable.

Past performance is no guide to future returns and may not be repeated.
